

Effective January 1, 2019,  
LabCorp will continue to be a  
national in-network provider for all  
**UnitedHealthcare** members.\*

**You have a choice about the  
laboratory you use in 2019.**

## Please continue to send your **UnitedHealthcare** patients' laboratory testing to LabCorp.

LabCorp offers many service enhancements for you and your patients, including:

### **Comprehensive Test Menu**

- Nearly 5000 frequently requested, specialty, and genetic tests, with an increased emphasis on precision medicine tests to help you provide more personalized care for each patient

### **Variety of Test Order and Result Delivery Solutions**

- Simplified test orders and results through intuitive EHR interfaces, including access to historical test LabCorp results regardless of the ordering physician

### **Patient Convenience and Access**

- Convenient, easy-to-use online and web-based tools to help patients make lab appointments, streamline the lab check-in process, obtain an advance estimate of out-of-pocket costs for their testing, access test results, and simplify billing and payment
- Expanded specimen collection locations, including a growing retail presence

### **Value-based Care**

- Data tools to help your practice with value-based care and population health initiatives

### **Clinical Studies**

- The opportunity for you and your patients to participate in clinical studies through our Covance business, helping to advance treatment of complex diseases and speed the delivery of new treatments to patients

LabCorp is committed to providing convenient high-quality, and cost-effective laboratory testing.

LabCorp is your one-source laboratory, combining its expertise in innovative clinical test technology through its specialized labs and the LabCorp Specialty Testing Group.
