TESTS	RESULT	FLAG	UNITS	REFERENCE INTERVAL	LAB
TgAb+Thyroglobulin, IMA or RIA					
Thyroglobulin Antibody	<1.0		IU/mL	0.0 - 0.9	01
Thyroglobulin Antibody measured by Beckman Coulter Methodology					
Thyroglobulin by IMA	1.5		ng/mL	1.4 - 29.2	01
Comment:					01

According to the National Academy of Clinical Biochemistry, the reference interval for Thyroglobulin (TG) should be related to euthyroid patients and not for patients who underwent thyroidectomy. TG reference intervals for these patients depend on the residual mass of the thyroid tissue left after surgery. Establishing a post-operative baseline is recommended.

The assay limit of quantitation is 0.1 ng/mL
