Rh-hr Genotype w/ABO Grouping

Rh-hr Genotype:

Blood Grouping:

- Rh(D): Positive 01
- C: Positive 01
- E: Negative 01
- c: Positive 01
- e: Positive 01

Rh-Genotype w/ABO

INTERPRETATION OF  Cauca  Black  Mestizo*

GENOTYPE:  -------  -------  -------

Most probable genotype: CDe/cde  CDe/cDe  CDe/cde

% likelihood of being homozygous for D: 10% 59% 15%

*Note: Mestizo frequencies were derived from a study of Mexican and Mexican-American population studies. The term "Mestizo" is commonly used in Hispanic countries to describe persons of mixed European and American Indian ancestry.
